2 WHEEL STEER

Following Your Lead

Productivity often hides in the details, such as getting from one field to another quickly.

Trailing your combine head with a Horst CHC Wagon keeps you moving with safe and easy road travel. The no-sway design of Horst's running gear provides a smooth trailing wagon that eliminates the zig-zag action through tapered roller bearings on all the main pivot points. This includes the king-pins and steering pivot joint. The predictable trailing movement of Horst's Header Wagons is especially important for combine operators who don't have a clear rear-view and need to rely on a steady trailing wagon.

Sturdy yet flexible, Horst CHC Wagons are made with double tube construction designed to handle uneven ground reliably.

For road travel, heavy-grade tires with low wearing tread is standard on all models. An optional light kit is also available for increased visibility during nighttime driving.

Get from field to field quickly and efficiently with a quality built Horst Combine Header Wagon that handles your header safely and travels smoothly. Contact Horst Welding about the right size wagon for your combine head.

Models: CHC25, CHC30

FEATURES

Tapered Roller Bearings in Main Pivot Points

Roller bearings keep pivot points tight, ensuring no trailer sway and long-lasting use.

Ratchet Strap & Wrench

The durable ratchet strap secures the head and prevents shifting and bouncing during road travel. The wrench stores on the wagon, ready when you need it.

Quick Release Header Mount

Easily reposition the header mount by simply lowering the over-centre locking handles.

Adjustable Top Rail

Makes sure wagon fits most sizes and models of combine heads.

Road Signal Light Kit (optional)

Make road travel safer by adding the road signal light kit which includes brake, turning and hazard lights.

Retractable Automatic Relock Tongue Latch (with standard variable length adjustment)

Take the precision work out of hooking up by freely moving the tongue into place and watch it lock into place as soon as it is in motion.

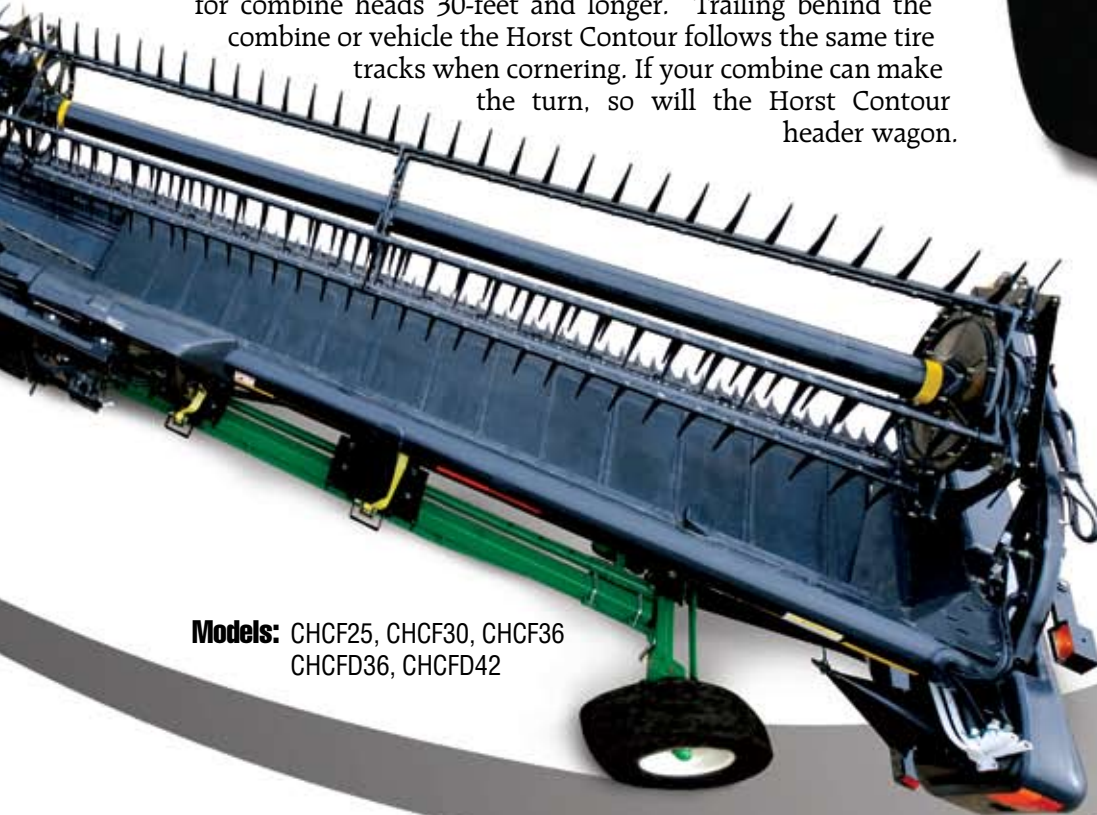

HORST CONTOUR

4 WHEEL STEER

The header wagon that turns as sharp as your combine.

Take the hassle out of transporting wide heads from field to field with the 4-wheel steer Contour header wagon. Built with all the same features as the standard model, the Contour adds greater maneuverability with 4-wheel steering which is ideal for combine heads 30-feet and longer. Trailing behind the combine or vehicle the Horst Contour follows the same tire tracks when cornering. If your combine can make the turn, so will the Horst Contour header wagon.

Models: CHCF25, CHCF30, CHCF36
CHCFD36, CHCFD42

Trailing behind the combine or vehicle the Horst Contour follows the same tire tracks when cornering. If your combine can make the turn, so will the Horst Contour Header Wagon.

The Contour Header Wagon matches the sharp turning performance of your combine for easy turning. The rear wheels are linked mechanically and steer in the opposite direction as you begin turning. This keeps the wagon on track with the turning arc of the tow vehicle, passing through narrow entrances easily.

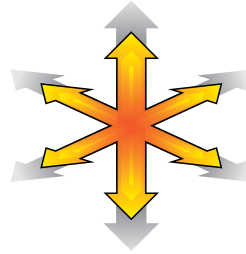

HORST WAGONS

Draper Header Mount

Oversized triple-axis adjustable header mount for a perfect fit

Tri-Axis Adjustability

- Up, Down
- Forward, Backward
- Left, Right

Draper heads have never been easier to load and unload with Horst's new draper header mount. The exclusive draper mount is designed with a greater landing surface which makes lining up the header and wagon effortless. The draper header mount adjusts on three axis, left to right, forward and back, and up and down. This triple adjustment feature ensures that each resting point is perfectly positioned for your draper head.
